CHRISTIAN COUNTY SCHOOLS

School-wide Student Voice

Educators rely on established metrics + data—Freshmen on Track, FAFSA Completion, and more—to support students' college + career readiness. But inconsistent measurements, reporting delays, and inability or lack of capacity to collect school data can impede your efforts.

OneGoal's Postsecondary Culture Survey supplements traditional metrics with real-time feedback from students about the postsecondary culture in your school and district.

Access Unique Data

Survey questions are written to specifically evaluate the complex dynamics of your school's postsecondary culture, providing an extra layer of depth + breadth. Our team will collaborate with you to co-create a plan for survey administration using our user-friendly platform.

Timely Reporting

Access survey data as soon as days after your administration window closes, providing an accurate snapshot of the current state of your postsecondary culture. View district- and school-level data, and disaggregate it across identity groups through dynamic dashboards that ensure student privacy.

Drive Improvement

OneGoal helps you make meaning from results through facilitated conversations. We will analyze strengths and areas for growth, consider evidence-based actions for improvement, and create a plan for sustained impact. Annual survey use allows you to track and interpret data over time.

OneGoal.

Survey Covers Four Key Topics

All survey questions are anonymous + optional

Student Preparedness

To what extent do students have access to the preparation, experiences, and resources they need to reach their highest postsecondary aspirations?

Advising + Relationships

To what extent do students have access to the advising they need to reach their highest postsecondary aspirations?

High-Quality Coursework

To what extent do students have access to the academic experiences and support they need to reach their highest postsecondary aspirations?

Postsecondary Ecosystem

To what extent do students have access to a postsecondary ecosystem that supports their ability to reach their highest postsecondary aspirations?

WHAT MAKES US DIFFERENT

Unlike other culture + climate surveys, OneGoal's innovative approach is inclusive of multiple post-graduation pathways. Our survey questions provide an extra layer of depth + breadth, allowing our partners to fully understand the postsecondary culture in secondary schools.
